

Teufel announces high end “Reference” speaker cable range

Experience the pinnacle of pristine sound with Teufel’s Reference line

Berlin, Germany XX December 2009: Teufel, Europe’s leading direct seller of loudspeaker systems, today announces the launch of its Reference line of speaker cables.

Elegant in every respect, the range is designed to provide audibly-superior sound quality and breathe new life into your speakers. Teufel’s lengthy experience in creating high-quality speaker systems enables it to construct a cabling product that reflects its ultra-high manufacturing standards and technological abilities.

The Reference series uses only the very best materials and delicate processes to achieve a truly unique product. Teufel uses only the purest copper, processed in a special, lengthy process. This ensures the minimum of lossy compression, significantly reduced resistance and a highly dynamic, accurate signal with no hardness or aggression.

Whether you prefer using banana plugs, a tip or a shoe, Teufel’s loudspeaker cable provides the ideal connection for you. Supplied with three interchangeable adaptors, each made from non-oxidised 24k gold, you can be sure of uncompromising quality and compatibility.

Cables are shielded and dampened to prevent vibration – of particular benefit when playing deep bass sounds. Various layers of PE Dielectric and CU braid isolation material, coated in protective nylon, dampen the magnetic inputs and protect from external interference from other electric equipment, resulting in exact, dynamic playback.

The line includes:

Reference Loudspeaker Cable – available in 2.5m, 5m and 10m lengths, this high-end cable features 24k gold connectors and a choice of connection methods.

Reference Stereo RCA Cable – For a perfect analogue connection, these cables are the ultimate choice. Available in either 1.5m or 3m lengths, these offer stereo RCA connections in a single, highly shielded cable.

Reference Subwoofer Mono RCA Cable – Subwoofers naturally require a perfect cable connection from an AV receiver, and you can’t get more perfect than this. Available in 2.5m, 5m and 10m lengths the cable is shielded against any form of low-frequency interference.

Reference digital coaxial cable – An RCA cable designed entirely for digital coaxial use, with 75 Ohm cable to ensure perfect digital transmission. Available in 3m length.

Reference digital optical cable – A high-quality TOS link cable with robust construction for clear transmission of digital optical audio signal. Available in 3m length.

Reference Subwoofer Y-Adapter – Many receivers only offer a single subwoofer output, while some Teufel systems feature two bass units. This splitter ensures a correctly distributed signal and optimum sound quality.

The Teufel Reference range is available now – prices range from £53 to £358*. For further information please visit www.teufel.eu/Accessories/reference-cable/

*All prices quoted were correct at the time of press, however please note that they may be some variance due to the exchange rate of the euro.

About Teufel

Teufel is Europe's leading direct seller of loudspeaker systems. The company was founded in Berlin in 1979 and quickly became a high-flyer amongst German specialist loudspeaker manufacturers. Over the years, Teufel has developed and manufactured a large number of high-quality audio products.

In addition to home cinema loudspeakers, Teufel's portfolio also includes multimedia and PC systems as well as various products for iPods under the iTeufel name. In 1996, Teufel was the first German company to launch loudspeakers with a THX licence – an extremely exacting standard for the playback quality of home cinema systems. Today, Teufel offers the largest range of THX loudspeakers in the world. Teufel products are available exclusively via direct sales – guaranteeing you high quality at a fair price.
